Subject: Microsoft Settlement

Ok, enough is enough, let's move on and accept the settlement with Microsoft. Then go after someone that is really in total control and unfairly taking advantage of the consumers. The Cable companies! It's just plain usury what the cable companies charge for what they provide and now they are doing the same with the cable internet access.

If it weren't for Bill Gates and Microsoft we wouldn't be communicating by email because most of us couldn't afford to own a computer much less have the software to use it to it's full advantage. I've been around since mainframes were the only thing and pc's weren't even in the realm of home use. Gates made it all affordable and even today his software is affordable and the best to be had.

Dragging this thing on just hurts our economy more that it is already hurting. So put it to rest and look into why the money from the tobacco companies settlements isn't going to where it was meant to go. Get involved with issues that really effect the population.
